

Personal Portfolio Website

Front-End Web Development Project Report

Student Name	Fatima Kaleem
Internship Domain	Web Development
Task Number	Task 1
Project Title	Personal Portfolio Website
Technologies	HTML5, CSS3
Submission Date	August 2026

GitHub Repository: <https://github.com/fatimakaleem090-maker/portfolio-website>

<https://github.com/account>

1. Objective

The objective of this task was to design and develop a fully responsive personal portfolio website using core front-end web technologies. The website is intended to showcase the student's academic background, technical skills, and completed projects in a clean, professional, and visually appealing single-page layout that works seamlessly across both desktop and mobile devices.

2. Technologies Used

- HTML5
- CSS3
- Flexbox
- CSS Grid
- Media Queries
- CSS Variables
- Responsive Design

HTML5 was used to build the semantic structure of the page (nav, section, form elements), while CSS3 handles all visual styling, including a Flexbox-based navigation bar and hero section, a CSS Grid layout for the skills and projects cards, custom properties (:root variables) for a consistent color palette, hover animations, and a @media breakpoint at 768px that reflows the layout for mobile screens.

3. Website Structure

Section	Purpose
Navigation Bar	Fixed top navigation with logo and anchor links to every section
Hero / Home	Introduction with name, role, short bio, profile photo, and a call-to-action button
About	A short paragraph describing interests and academic focus
Skills	Card-based grid displaying technical skills with star ratings
Education	Academic background card showing degree, institution, and duration
Projects	Grid of project cards, each with a thumbnail, tech stack tag, and description
Contact	Contact details (email, phone, location, LinkedIn, GitHub) plus a contact form
Footer	Copyright notice and social media links

4. Design Approach

The design follows a mobile-first, component-based approach. Each section of the page was built as an independent, self-contained block with its own padding and heading style, which made the layout easier to maintain and extend.

- **Color palette:** A calm light-blue background paired with a dark navy (#1f2937) navigation/footer and a strong blue accent (#2563eb) used consistently for buttons, links, and headings.
- **Layout system:** Flexbox for the navbar and hero section (so content and image sit side-by-side on desktop), and CSS Grid for the skills and projects sections so cards wrap automatically.
- **Cards & elevation:** White cards with soft box-shadows and a subtle lift-on-hover animation (translateY) give the skills, education, and project sections visual depth.
- **Responsiveness:** A single @media (max-width: 768px) breakpoint collapses the navbar into a column, switches grids to a single column, and reduces section padding and heading sizes for smaller screens.

5. Website Features

- Sticky, single-page navigation with smooth anchor scrolling to every section
- Hero section with profile photo, short introduction, and a "Contact Me" call-to-action button
- Skills section presented as star-rated cards in a responsive grid
- Education section highlighting the ongoing BSCS degree
- Four project cards, each with a thumbnail image, tech-stack label, and a two-part description

- Contact section with clickable email/phone links, LinkedIn and GitHub links, and a working contact form UI (name, email, subject, message)
- Footer with copyright text and repeated social links
- Fully responsive layout that adapts cleanly from a 1440px desktop view down to a 390px mobile view

6. Code Snippets & Implementation

Navigation Bar

index.html

```
<nav>
  <h2 class="logo">Portfolio</h2>
  <ul>
    <li><a href="#home">Home</a></li>
    <li><a href="#about">About</a></li>
    <li><a href="#skills">Skills</a></li>
    <li><a href="#education">Education</a></li>
    <li><a href="#projects">Projects</a></li>
    <li><a href="#contact">Contact</a></li>
  </ul>
</nav>
```

Home / Hero Section

index.html

```
<section class="hero" id="home">
  <div class="hero-text">
    <h3>Hello, I'm</h3>
    <h1>Fatima Kaleem</h1>
    <h2>BSCS Student</h2>
    <p>
      I am passionate about web development and programming.
      I enjoy learning new technologies and building creative projects.
    </p>
    <a href="#contact" class="btn">Contact Me</a>
  </div>
  <div class="hero-image">
    
  </div>
</section>
```

About Section

index.html

```
<section class="about" id="about">
  <h2>About me</h2>
  <p>
    I am a BSCS student interested in web development,
```

```
    programming, and technology. I enjoy learning new
    skills and working on creative projects.
  </p>
</section>
```

Skills Section

index.html

```
<section class="skills" id="skills">
  <h2>My Skills</h2>
  <div class="skills-container">
    <div class="skill-card">
      <h3>HTML</h3>
      <p>★★★★★</p>
    </div>
    <div class="skill-card">
      <h3>CSS</h3>
      <p>★★★★★</p>
    </div>
    <div class="skill-card">
      <h3>JavaScript</h3>
      <p>★★★★☆</p>
    </div>
  </div>
</section>
```

Education Section

index.html

```
<section class="education" id="education">
  <h2>Education</h2>
  <div class="education-container">
    <div class="education-card">
      <h3>BS Computer Science</h3>
      <h4>DHA Suffa University</h4>
      <p>Currently pursuing my Bachelor's degree in Computer Science.</p>
      <p>2023 - Present</p>
    </div>
  </div>
</section>
```

Projects Section

index.html

```
<section class="projects" id="projects">
  <h2>My Projects</h2>
  <div class="projects-container">
    <div class="project-card">
```

```

        
        <h3>Student Record Management System</h3>
        <p class="project-tech">Java + SQL</p>
        <p>A Java application for storing, updating, and deleting student records using
a MySQL database.</p>
        <p>Applied object-oriented design principles and JDBC for database
connectivity.</p>
    </div>
    <!-- Additional project cards follow the same markup pattern -->
</div>
</section>

```

Contact Section Info Block

index.html

```

<section class="contact" id="contact">
    <h2>Contact Me</h2>
    <p>I'd love to hear from you.</p>
    <div class="contact-info">
        <p><strong>Email:</strong> <a
href="mailto:fatimakaleeem090@gmail.com">fatimakaleeem090@gmail.com</a></p>
        <p><strong>Phone:</strong> <a href="tel:+92 3305070907">+92 3305070907</a></p>
        <p><strong>Location:</strong> Karachi, Pakistan</p>
        <p><strong>LinkedIn:</strong> <a href="https://www.linkedin.com/in/famy-mirza"
target="_blank">LinkedIn</a></p>
        <p><strong>GitHub:</strong> <a href="https://github.com/fatimakaleeem090-maker"
target="_blank">GitHub</a></p>
    </div>
</section>

```

Contact Form & Footer

index.html

```

<form class="contact-form">
    <label for="name">Name</label>
    <input type="text" id="name" placeholder="Enter your name">
    <label for="email">Email</label>
    <input type="email" id="email" placeholder="Enter your email">
    <label for="subject">Subject</label>
    <input type="text" id="subject" placeholder="Enter subject">
    <label for="message">Message</label>
    <textarea id="message" placeholder="Write your message"></textarea>
    <button type="submit">Send Message</button>
</form>

<footer>
    <p>© 2026 Fatima Kaleem. All Rights Reserved.</p>
    <div class="social-links">
        <a href="https://github.com/fatimakaleeem090-maker" target="_blank">GitHub</a>

    </div>

```

```
</div>
</footer>
```

CSS Layout & Responsive Rules

style.css

```
/* Navigation bar */
nav {
  background-color: var(--dark-color);
  color: var(--white-color);
  display: flex;
  justify-content: space-between;
  align-items: center;
  padding: 20px 50px;
}

/* Logo */
.logo {
  font-size: 28px;
  color: var(--white-color);
}

/* Responsive / Mobile Rules */
@media (max-width: 768px) {
  nav {
    padding: 20px;
    flex-direction: column;
  }
  nav ul {
    margin-top: 15px;
    flex-wrap: wrap;
    justify-content: center;
  }
  .skills-container {
    display: grid;
    grid-template-columns: 1fr;
    gap: 20px;
  }
  .projects-container {
    display: grid;
    grid-template-columns: 1fr;
    gap: 20px;
  }
}
```

7. Showcase Projects Summary

Project Title	Domain / Tech Stack	Key Highlights & Description
---------------	---------------------	------------------------------

Student Record Management System	Java + SQL	A Java application for storing, updating, and deleting student records using MySQL. Applied OOP principles and JDBC connectivity.
Automatic Plant Irrigation System	Digital Logic Design	A team project automating plant irrigation using sensors and relays based on soil moisture levels. Secured 1st place for innovation and functionality.
File Management System	Operating Systems / Ubuntu	A file management system built on Ubuntu implementing core file operations (create, read, update, delete) within Linux environment.
Customer Churn Predictor	AI / Python	A machine learning model developed to predict customer churn using logistic regression, scikit-learn, pandas, and NumPy.

8. Conclusion

This task provided hands-on experience in building a complete, responsive personal portfolio website from scratch using only HTML5 and CSS3. Through this project, practical skills were strengthened in semantic page structure, Flexbox and Grid-based layouts, CSS custom properties, hover interactions, and mobile-first responsive design using media queries. The final result is a clean, single-page portfolio that clearly presents academic background, technical skills, and project work, and that adapts smoothly across desktop and mobile screen sizes.
